Alphabetical list

STRETCH INSERTS

01

in strategic areas, such as at the back below the waistband and the crotch, for optimal freedom of movement. Reinforced with the extremely resistant Cordura® fibre for a superior durability.

HIGH PERFORMANCE FABRICS

02

with work trousers made of mechanical stretch fabric with 4-way stretch Cordura® inserts and Cordura® Stretch knee pockets. The T-shirt and polo shirt fabrics are antibacterial, quick drying and offer UV sun protection.

PERFECT MATCH WITH D-FX

03

In the same 6 colours and with an equally dynamic look. Easily mix and match your favourite items from the D-FLEX and D-FX collections to create a stylish outfit.

ADAPTED FIT

04

a nice and tailored fit, without having to compromise on comfort thanks to the mechanical stretch fabric and the additional stretch inserts.

REFLECTIVE DETAILS

05

on every garment in this collection: a nice extra touch, for a stylish look!

NEW D-FLEX COLLECTION

MAKE YOUR MOVE. Stretching, bending, kneeling, reaching ... as a professional you are on the move all day long. You continuously strive to achieve the best performance possible. Rely on D-FLEX for durable work clothes with stretch. So that way you can get to work unhindered. Because you are constantly on the move, and your work clothes move with you.

DASSY® D-FX

COLLECTION

EXPERIENCE D-FX. As a professional, you work in all kind of circumstances: wind, cold, snow, dust,... The right workwear supports you in all your efforts. **Experience D-FX** ('the effects') of a powerful technical design, combined with a dynamic fit, to cause the effect you desire. Anytime. Anyplace. Because you never back down. And neither does your workwear.

MECHANICAL STRETCH FABRIC

01

The mechanical stretch main fabric guarantees an increased freedom of movement and an improved comfort.

POCKETS REINFORCED WITH CORDURA®

02

for a superior durability. Result: extremely solid and wear-resistant pockets to safely store your tools within reach. Also discover it in the other DASSY collections.

WATER-REPELLENT TREATMENT

03

As an additional asset, the fabric of the work trousers received a water-repellent treatment. When wetted by water, water drops will roll off the surface.

MODERN FIT

04

tailored and comfortable. With a lowered waist and reflective details = a modern look guaranteed! Also discover it in the D-FLEX collection.

NEW COLOUR RED/BLACK

05

choose between six different colours: elegant black, dynamic azure blue, neutral anthracite grey, stylish midnight blue, classic clay brown or striking red.

DETACHABLE HOOD
with elastic drawcord

DASSY® **HYPER**

WIND- AND WATERPROOF WORK JACKET

A fail-safe protection against the rain, thanks to the waterproof fabric and waterproof taped seams. Also, you can keep out icy wind by adjusting the width of the cuffs or waist. Since the fabric is breathable, transpiration moisture can ventilate. This prevents moisture accumulation or heating and keeps you dry at all times. And the 3D mesh lining? That helps you to maintain your body temperature. The **DASSY® HYPER** is available in no less than 6 different colour combinations.

EN 343:2003+A1:2007

DASSY®

CLASSIC

COLLECTION

This collection is a classic. Count on a proven track record in terms of quality, functionality, durability and comfort. Thanks to the comprehensive range and colour palette you can quickly and easily find the workwear that fits your specific work situation and company colours. Because your work perfectly meets the needs of your customers, and your workwear meets yours.

COMPREHENSIVE RANGE

01

quickly and easily find what you are looking for. With specific subcollections for different target groups: painters, women, kids,...

BROAD RANGE OF COLOURS

02

you will definitely find a perfect match with your company colours. Easily combine tops and bottoms into one professional look.

LARGE HEM

03

easily extend your work trousers or overall: just undo one seam in the hem and obtain 5 cm extra (about 2")! Thanks to the large hem, the lengthened trousers are still nicely finished. Also discover it in the other DASSY collections.

ADJUSTABLE BACK ELASTIC

04

your work trousers fit perfectly around your waist and do not fall down. Also discover it in the other DASSY collections.

THREE-NEEDLE STITCHING

05

makes your workwear strong and long-lasting. Also discover it in the other DASSY collections.

DETACHABLE HOOD
with elastic drawcord

DASSY® **MINSK**

WINTER JACKET

Your sidekick for the winter. Nice and warm with waterproof taped seams and water- and windproof fabric. Since the fabric is also breathable, transpiration moisture can ventilate. This prevents moisture accumulation or heating and keeps you dry at all times.

Thanks to its unique design the DASSY® MINSK can easily be combined with all DASSY collections.

CERTIFIED PROTECTION

01

To guarantee a high-quality protection, all garments from this collection meet the relevant European standards (as described on p. 86-87).

HIGH VISIBILITY

02

Stand out at work, both during the day, at twilight and at night.

SAFE IN SUMMER

03

NEW: now also discover the SAFETY workwear in a lighter fabric quality, with UV protection and/or mesh inserts.

MULTINORM

04

Rely on multipurpose, versatile protection. Also available in high visibility variant!

FLAME RETARDANT

05

Short exposure to flame spread or any form of heat? Flame retardant work clothing can make all the difference.

SAFETY *COLLECTION*

Work safely. It is a fundamental right of every professional. DASSY SAFETY offers you the **certified protection** you need to minimise the risks you encounter in your work situation. That way you can focus on the job. And your workwear keeps you safe.

DASSY® HIGH VISIBILITY VISIBLY SAFE

High visibility clothes put you - almost literally - in the spotlight. While the fluorescent material makes you stand out in daylight, mist and fog, the reflective tape keeps you protected at twilight and at night.

NEW

NOW ALSO EXTRA LIGHT

Count on the same visibility and durability, also when working in warmer temperatures or performing labour-intensive work. **But lighter!** Several models of the high visibility collection are now also available in a lighter fabric quality (main fabric + contrast fabric both $\pm 245 \text{ g/m}^2$). **Being in the spotlight, has never been this light!**

DASSY®

DASSY® MULTINORM

MULTIFUNCTIONAL PROTECTION

Heat and flame, welding spatter, electric arc, liquid chemicals, explosions... Are these the kind of dangers you are exposed to in your work environment? Rely on versatile, multifunctional protection that seriously reduces the risk of potential injuries.

The multinorm collection meets the five most required European standards for flame retardant protection, welding, antistatic properties, electric arc and chemicals (more info p.85). Moreover, the high visibility multinorm models add an EN ISO 20471

certified protection, for higher visibility during the day, at twilight and at night. Consult your garment's label and user information for the specific standards which the protective clothing meets.

DASSY® FLAME RETARDANT

GET FIRED UP FOR SAFETY

If you are exposed to spatter, flame spread, heat,... this clothing can make all the difference. The flame retardant finish, hidden metal closings, pockets with flaps,... help to reduce flame spread, reducing the risk of serious injuries considerably.

The DASSY flame retardant clothing is certified to the European ISO standards for welding and heat-resistant clothing (more info p. 85). Consult your garment's label and user information for the specific standards which the protective clothing meets.

FOR AND BY PROFESSIONALS

"I test the workwear where it really matters: on the job. Thanks, in part, to my feedback DASSY manages to make workwear that perfectly meets the wishes and needs of professionals."

TESTED AND APPROVED

Did you know that ... all DASSY workwear is tested and approved by professionals to ensure that it fully meets the needs of the end-user?

It all starts with the basis: Even before the actual design of the workwear, requirements are set which the fabric and the finishes have to meet. All raw materials are thoroughly tested by independent inspectors. That way we can guarantee that **no harmful substances are used** in any part of our clothing, including fabric, garn, buttons, zippers,...) An annual renewal of the Oeko-tex® testing and certification process confirms our commitment.

Next, the wear and tear resistance, colour fastness, tensile strength, etc. of all fabrics are judged by **independent, recognised test centres and by the DASSY experts at the brand new DASSY test lab** (see below).

On the job, the workwear is tested in great depth by the members of the DASSY test team. This group of independent professionals from diverse occupations and industries assess the workwear based on its performance on their specific job. They wear the test pieces day in, day out in actual work situations, and are therefore extremely well-positioned to judge the durability, practicality, comfort,... of the DASSY workwear and safety shoes.

With the feedback of the test centres and the test team the DASSY designers get back to work: The recommendations are studied in depth and taken into account in the design. Next, the adjusted product is tested again by the test team. And if necessary, adjusted again until it fully meets the needs of the user.

Result: professional workwear tested and approved by professionals.

BRAND NEW DASSY TEST LAB

To measure is to know. High quality workwear is made from quality fabrics. That is why all fabric for DASSY clothing is thoroughly tested. To be able to perform these tests even more profoundly in-house, a completely new test lab was installed at the production centre in 2019. The DASSY fabric experts now have the most efficient materials and technologies to assess the quality of the fabric.

The fabrics are extensively tested in 3 different test zones:

- **Conditioned zone:** The fabric undergoes rigorous physical tests, which among other things assesses the tensile and tear strength, abrasion resistance, pilling, frictional resistance, etc.
- **"Wet" zone:** In the so-called "wet" zone there are different washing and drying machines. The fabric is subjected to various washing procedures to optimally evaluate its colour fastness and shrink sensitivity.
- **Colour monitoring:** To correctly assess the colour of the fabric and to monitor the continuity of the colours, this zone is equipped with a light box, spectrophotometer and inspection tables with daylight.

Result: A more profound check of the fabric guarantees an even better performance of the DASSY workwear.

WORKWEAR

THAT DOES THE JOB FOR YOU

It's more than just a slogan. It is a mission. To offer workwear that meets the highest requirements in terms of quality, durability and functionality. And to help professionals to make the most out of their job.

QUALITY In the first place DASSY professional workwear is synonymous to quality. From fabric to finish, we resolutely opt for high quality materials that pass the most stringent tests.

To guarantee a maximum level of quality, **DASSY is in full control of the production process: from design, over production to logistics.** This not only benefits the quality of our workwear, but also allows for a great flexibility to quickly respond to the specific needs of the professional market.

FUNCTIONALITY Obviously, workwear has to be functional. That is why our work clothing is expertly designed and tested on the basis of the specific work situation of the user down to the smallest detail. Like no other we know which work pockets a professional needs and which practical features offer a real added value. Like the typical DASSY large hem that allows you to easily extend your work trousers by 5 cm. Furthermore, the importance of a good fit cannot be underestimated either. Well-fitted workwear is not only more comfortable and more practical, but also safer.

DURABILITY Focusing on quality also benefits the durability of workwear. In other words: your workwear last longer. We rely on established values for this, such as the Cordura® brand, the extremely durable fabric used to reinforce work clothes in strategic areas, and the robust zippers from YKK.

DESIGN And that it looks good? That is an added-value of our workwear! DASSY combines timeless design with innovative elements and builds up all collections so that you can quickly and easily find the right clothing combination, completely in line with your company colours.

SOCIALLY RESPONSIBLE FROM A TO Z

To us, social responsibility is more than just a trending word. It is in our DNA. As a family company, the safety and health of our employees is of the highest importance. Both in our production facility in Sri Lanka and in our main offices and semiautomatic warehouse in Bruges.

To offer workwear that meets the expectations from the modern professional, we first meet the needs of our employees. Therefore we create a safe and healthy working environment where every employee can develop and excel.

A COMMITMENT WE CONTINUE TO MAKE. DAY AFTER DAY.

In accordance with the 11 principles of the amfori BSCI code of conduct the working circumstances in our entire supply chain are **continuously evaluated** and – where necessary – **optimised**. And with result. The most recent amfori BSCI audit carried out at the DASSY production facility yielded an overall A rating. The highest possible rating.

We genuinely care about the happiness and well-being of all our employees. We want everyone to feel good at work. In the first place, that means a **safe working environment, fair working conditions and respect for the rights of every employee. But our commitment goes a step further.** For instance, at our production facility our employees can also count on medical care, transport to and from work, healthy meals, etc.

And there's more! Under the motto **"Work hard, play hard"** we also think it is important to offer sufficient pastime activities. We set up company initiatives and put our shoulders under the spontaneous initiatives of our employees. For example, in our production facility there is a debate club, cricket team, dance group, creative workshops, etc. The colleagues in Bruges enjoy the DASSY fitness room, ping-pong table, yoga sessions.

"Although nowadays too often used as a trending word, we consider social responsibility a fundamental commitment to strive for social and environmental objectives in all our business operations and relations with other actors."

Stefan Van Ende, managing director, DASSY EUROPE BVBA

GOOD FOR PEOPLE AND FOR THE ENVIRONMENT

Besides meeting all applicable environmental laws and regulations, our commitment to the environment extends to continuous initiatives intended to reduce our environmental footprint. At the basis of sustainable product development lies the choice for innocuous raw materials : the Oeko-tex® standards 100 certificate endorses our commitment and guarantees that **no harmful substances are used** in the manufacturing of our clothing. Our choice for high quality materials also results in workwear that is more robust and more durable. Your workwear lasts longer and does not need to be replaced as quickly. That way, our workwear does not only have a positive impact on its wearer, but also on the environment.

Furthermore, we opt for maritime transport to limit our CO2 emissions as much as possible. Thanks to the energy-saving measures that we are constantly taking and thanks to the solar panels on the roof of our head office, our buildings in Bruges are almost completely energy-independent. Finally, as part of our waste prevention and recycling policy, we undertake many small initiatives that together have a major impact.

NEW
DASSY® **TRIX**
WORK SHORTS WITH STRETCH
AND MULTI-POCKETS

EN ISO 20471:2013 - High visibility

High-visibility warning clothing makes the wearer more visible during the day, at twilight and at night. It is legally required for anyone working on roadways and on construction sites. Even if only a limited part of the day is spent in a workplace with traffic, safety clothing must always be worn.

There are 3 classes of high visibility clothing. The more fluorescent and reflective material present in the garment, the higher the class and the visibility of the wearer*. Always check first which safety class is required for your specific work situation.

CLASS	Surface area of fluorescent material (m ²)	Surface area of reflective material (m ²)
1	0,14	0,10
2	0,50	0,13
3	0,80	0,20

**Note that personalising your high visibility workwear reduces the surface area of the fluorescent material. This process may jeopardise the certification of the garment. Embroidering without prior permission from a notified body is prohibited. Please contact your safety advisor for these purposes.*

EN 14058:2004 - Protection against cold environments

X (thermal resistance class 1 - 3)
 X (air permeability class 1 - 3, optional)
 X (water penetration resistance class 1 - 2, optional)
 X (resultant effective thermal insulation, optional)
 X (effective thermal insulation, optional)

These garments protect its wearer against cold environments (temperature up to -5°C). An X means that the garment has not been tested on that specific characteristic.

To meet this norm, the garments should be worn completely closed. If there are adjustment possibilities (i.e. on wrists or waist), these should also be used. The thermic insulation can decrease if the garment gets wet and after cleaning procedure. Keep garments in a dry and well-ventilated place in order to maintain the level of protection. Wearing extra protection to prevent cooling off for example head, hands and feet is optional with EN 14058:2004.

EN 343:2003+A1:2007 - Protection against rain and bad weather

X = water resistance
 Y = moisture vapour permeability

These garments protect against rain, snow, fog and soil moisture. The garments and the seams are tested for their resistance to water penetration and water vapour resistance. There are 3 classes. Class 3 offers the highest level of waterproofness and breathability.

EN 14404: 2004 + A1: 2010 - Protection for work in kneeling position

This standard describes the test methods and requirements for knee protectors for work in kneeling position.

The DASSY knee pockets are certified in combination with the DASSY® CRATOS knee pads and offer a protection type 2, level 1, which means that they are suitable for flat and non-flat floor surfaces and offer resistance to penetration by objects < 1 cm.

EN 13034: 2005 + A1: 2009 **Protection against liquid chemicals**

This standard is required for type 6 protective clothing, that provides limited protection against small splatters or fumes of liquid chemicals and is intended for use in situations where the risks are assessed as low and a full liquid permeation barrier is not necessary. This type of clothing must cover the entire upper and lower body.

IEC 61482 - 2: 2009 **Protection against electric arcs**

An electric arc or blast as a result of a disruption (e.g. a short circuit) in an electric installation generates a sudden release of intense heat and light causing serious burns or other injuries. This standard is subdivided in different classes. Class 1 offers protection against an electric arc, generated by a short circuit of 4KA and for a time of 500 Ms.

EN 1149-5:2008 **Protection against electrostatic charges**

Antistatic clothing is worn to prevent sparks from electrostatic charges which can cause fire or explosion.

The standard (EN 1149) consists of various sections that specify the requirements and test methods for measuring protection against static electricity or damage from discharge. Part 5 of the standard (EN 1149-5) describes the performance requirements for antistatic clothing.

EN ISO 11611: 2007/2015 **Protection for welding and allied processes**

This standard specifies minimum basic safety requirements and test methods for protective clothing, including head and foot safety gear, which is designed to protect the wearer's body against spatter, short contact time with flame and radiant heat, and minimises the possibility of electrical shock (at accidental contact of +/- 100 V).

Flame spread is tested in the event of surface ignition (gives A1) and edge ignition (A2). A2 is divided into two categories, in which category 2 offers protection against more hazardous welding techniques.

EN ISO 11612: 2008 / 2015 - Protection against heat and flame

This standard specifies performance requirements for items of clothing that are designed to protect the wearer's body against heat and fire with the exception of the hands.

The standard mentions different forms of protection, indicated by a letter and an index for performance (the higher, the better protected).

- A: flame spread (2 levels)**
- B: convection heat (3 levels)**
- C: radiant heat (4 levels)**
- D: aluminium spatter (3 levels)**
- E: iron spatter (3 levels)**
- F: contact heat (3 levels)**

EN 13758-2:2003+A1:2006 - Protection against UV radiation

Clothing certified according to this standard offers protection against the sun's rays. A UPF (Ultraviolet Protection Factor) of minimum 50 offers the highest protection by blocking more than 98% of the sun's harmful UV radiation. The protection factor offered by clothing may be reduced with use or if stretched or wet. Only covered parts of the body are protected. Use a sunscreen with a high protection factor for uncovered parts of the body.

FABRICS

OVERVIEW

Everything starts with the fabric. That is why strict quality requirements are set early on, at the selection of the fabrics. Subsequently, these are subject to a multitude of tests in order to achieve the best result. This resolute approach results in durable, hard-wearing and colourfast fabrics, while comfort and design also are of fundamental importance.

All raw materials meet the Oeko-tex® standards, which ensures that no harmful substances are used in our clothing.

4-WAY STRETCH

Thanks to the 4-way stretch inserts, this workwear offers an excellent freedom of movement. The inserts are reinforced with the extremely resistant Cordura® fibre for a superior durability.

UV SUN PROTECTION

This clothing protects its wearer against the sun. An Ultraviolet Protection Factor UPF 50+ means that the fabric blocks more than 98% of the sun's harmful UV radiation.

EXTRA LIGHT FABRIC

Count on the same durability, also when working in warmer temperatures or performing labour-intensive work. But lighter! These models are (also) available in a lighter fabric quality (main + contrast fabric both $\pm 245 \text{ g/m}^2$).

	FABRIC CODE	FABRIC NAME	COMMERCIAL NAME	COMPOSITION	WEIGHT	DESCRIPTION

WASHING INSTRUCTIONS

GUIDELINES

Washing, maintaining and storing work clothes in the right way is important to not only guarantee durability, but also the functionality of the workwear. Every DASSY garment therefore carries a label with clear washing guidelines, that are always designed to care for the most delicate part of the garment.

WASHING SYMBOLS DECODED

The first step towards washing your (safety) clothing correctly, is to start with deciphering the laundry symbols. This practical overview helps you do so.

Washing

- Normal process
- Normal process
- Gentle process
- Normal process
- Gentle process
- Normal process

Bleaching/Drying

- Do not bleach
- Tumble drying possible low temperature
- Tumble drying possible
- Do not tumble dry

Ironing

- Max. 110°C
- Max. 150°C
- Max. 200°C
- Do not iron

Cleaning

- Dry cleaning
- Gentle process
- Do not dry-clean

INDUSTRIAL WASHING = the job of professionals

In your field, you are the expert. Leave the industrial washing of your workwear to other professionals. They wash clothes on a larger scale, have special washing and drying machines, know suitable detergents,...

This symbol can be found with the vast majority of the DASSY items of the CLASSIC, DNA and D-FX collections. It helps you to easily recognise the DASSY garments that were tested and approved for industrial washing and drying, according to EN ISO 15797. To obtain this norm, every garment undergoes different testing procedures, evaluating properties such as dimensional stability, colour characteristics, creasing,...

INDUSTRIAL WASHING = a safe choice

It is recommended to *have all DASSY safety clothing washed by a professional laundry service.*

The DASSY flame retardant clothing is tested for industrial washing in accordance with EN ISO 15797:2002. The PRO-8 label specifies the method of washing and drying that should be followed at the professional laundry.

For DASSY (multinorm) high visibility clothing, it is also advisable not to wash the clothing more than the number of cycles indicated with the product. That way the reflective/waterproof properties of the garment are not jeopardized and you can rely on a visibly safe result!

PERSONALISATION

CORPORATE IMAGE ADVERTISING

Your employees are the ambassadors of your company. The right, personalised look helps your company to stand out to (potential) customers and to create a professional first impression.

THE RIGHT LOOK: UNIFORMITY AT ITS BEST

A uniform outfit does not only increase the visibility of your company, it also exudes professionalism. All DASSY collections are structured in such a way that you can quickly and easily find the right clothing combinations in line with your company colours. For men and women. Definitely consult the practical colour's overview in this catalogue (pp. 97-113).

YOUR COMPANY LOGO IN THE PICTURE

Highlight your company name or logo by having them embroidered or printed on your workwear. Achieve maximum results from your corporate image advertising by making sure your logo or name is clearly visible. The ideal place on your jacket or sweatshirt is the back or chest, on your trousers it is the back pocket or leg.

EMBROIDERY, TRANSFER PRINTING, SILK-SCREEN,...?

There are various ways to place your company logo on your workwear. For example, embroidery is the best option for fleece jackets, but it is not advisable for waterproof garments. For T-shirts and polo shirts silk-screen or transfer printing is ideal.

A PRACTICAL DASSY PRINTER ZIPPER

To neatly personalise lined jackets or body warmers, printer zippers are often used. This zipper is situated inside the back panel of the workwear. That way, only the outer fabric can be hung over a printing plate. Result: a nice & smooth print.

PERSONALISING SAFETY WEAR? SAFETY FIRST!

Embroidery or printing can jeopardise the certification of safety garments. In case of high visibility clothing, for example, personalisation reduces the surface area of the hi-vis fabric. Always contact your safety advisor in advance for more information or ask your DASSY dealer for advice.

YOUR DASSY DEALER IS AT YOUR DISPOSAL

Do you have questions about personalising your corporate clothing? Or doubts regarding the most appropriate technique? Are you looking for a unique collection of professional workwear specially designed for you to take your corporate image advertising to the next level? This is possible! Ask your DASSY dealer for more information.

THE RIGHT SIZE

HOW TO MEASURE

Workwear with a perfect fit is not only more comfortable, but also safer and more practical. Take your measurements as shown in the drawing. Measure directly against your skin. Keep the measuring tape close to your body but not too tight.

Chest measurement:

- Measure your chest at the fullest point. (A)

Waist and hip measurement:

- **Men:** measure your waist circumference where you normally wear your trousers. (B)
- **Women:**
 - The **waist** circumference is measured horizontally at the narrowest part of the waist (= natural waist line) (B).
 - Measure your **hip** circumference at the fullest point (E).

Inside leg length:

- Measure your inside leg length from the crotch to the desired length. Stand up straight. (C)
- Most DASSY work trousers are available in **3 different inside leg lengths:** Standard (normal), Minus (short) and Plus (long). Thanks to the special large hem, every product can easily be lengthened by 5 cm.

The following overview helps you find the perfect inside leg length:

	Minus (short) -5	Standard	Plus (long) +5
Inside leg length	75cm 30"	81cm 32"	87 cm 34"
Length with large hem	80cm 31"	86cm 34"	92 cm 36"

LARGE HEM = 5cm extra

All DASSY work trousers, overalls and brace overalls have a special large hem. This means that the trousers can easily be extended: you just undo one seam in the hem and obtain 5 cm extra (about 2 inches)! Thanks to the large hem, the lengthened trousers are still nicely finished.

SIZE CHART

THE RIGHT SIZE DASSY D-FLEX, D-FX, DNA & CLASSIC WORKWEAR

C = inside leg length

STANDARD = 81-86 cm/32-34"

MINUS* = 75-80 cm/30-31"

PLUS* = 87-92 cm/34-36"

*Plus and minus are available in following sizes:

from size 40 up to 54 (BE-FR-ES-PT)

from size 46 up to 58 (DE-NL-PL-HR-IT-CZ)

from size C46 up to C58 (FI-SE-DK-NO-EE-LT-LV-IS)

from size 31 up to 43 (UK)

from size 28 up to 42 (UK - jeans)

Smaller and larger sizes are available on order, at a surcharge.

*The **DASSY® KNOXVILLE** Stretch Jeans with knee pockets do not have a large hem.
